## Pod of Peas

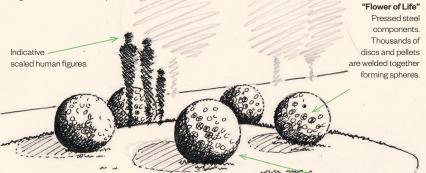

The rich soil of the local countryside has attracted farming and agriculture since ancient times and seeds like the popular 'Kelvedon Wonder Pea' helped make the town prosperous and famous in the Victorian era.

This 'Pod of Peas' design pays homage to that heritage. A series of human scale spherical steel 'peas' around an open space which can be used for meeting, seating or play.

Inspired by local agriculture and particularly seed production. A human scale collection of **super-sized seeds** that can be used as seating, meeting or play structures upon a raised area of grass within the central space.

**'Mound'** rises to 500mm high turf covered.

1 metre diaméter Spheres of multi component welded steel. Hot dip galvanised. Colour: white/grey patina.
